

Cleaning Advice

Regular cleaning of Concrete using WOCA Natural Soap

Regular cleaning of Concrete surfaces Natural Soap is a quality soap, which due to its nourishing properties quickly closes the pores of the surface and protects against dirt and penetration of liquids.

Natural Soap white is shaken carefully before use. 125 ml Natural Soap is mixed with 5 l of lukewarm water. It is recommended always to work with 2 buckets: one with soap water and one with rinse water. Clean the floor with minimum quantity of water – leave soap water on floor briefly in order to dissolve dirt. Remove dirty soap water with hard wrung out mop or cloth and rinse out in bucket with rinse water.

Always wipe floor with soap water with hard wrung mop or cloth in order to re-establish the protective Natural Soap film.

Tip: Very dirty floors may be cleaned with Wood Cleaner and subsequently with Natural Soap. Particularly difficult stains may be removed with Spot Remover.
